Net 25 for \$0.50

FOREWORD

It is with pleasure we hand you our annual catalog. Practically every Dahlia listed here is so well known throughout the Dahlia world that lengthy descriptions are unnecessary, so we have made them brief. Our orders are filled with field grown roots only and we guarantee our stock and service to be fully equal to that in the past. Thanking you for past favors and hoping for the continuance of same, we are,

Yours very truly,

M. G. TYLER,

A. T. MASTICK.

1934 MASTICK INTRODUCTION

***ROBIN ADAIR (SC—ID).** Winner of American Home Achievement Medal, 1932, in Portland, Oregon, at the show of the Columbia Valley Dahlia Society, the only time it has been in competition. An immense bloom, in depth as well as width, and the only one of Mr. Mastick's introductions he considered the superior of Marmion. Its color a deep empire yellow, with glistening sheen which fairly shimmers in sunlight, with reddish bronze shadings on reverse of florets and on the tightly closed center. Opens as an Informal Decorative, but as the season advances becomes a perfect Semi Cactus. Flowers and foliage are immune from ravages of insects. Stems are strong and upright, and the sturdy bushes of medium height and dark leathery foliage are covered with large blooms of perfect form from mid-season until frost.....\$10.00

NEW WASHINGTON INTRODUCTIONS

WESTERN GIANT (Lee-Mastick). Winner of American Home Achievement Medal at Portland, Oregon, also of a number of other awards at Northwest shows. Blooms are extremely large, 12 inches across by 7 in depth, and stems are extra strong and hold the big blooms upright above the foliage. Color is lavender and orchid pink with a blending of silver, and curling silver petaloids between the broad wavy petals. Habit is splendid. Net.....\$10.00

AIR MAIL (I. D.) (Kanouse-Mastick). New large dahlia of exquisite orchid coloring, originated in Washington, which has created a sensation wherever seen, winning first award in every class entered. Plants are thrifty and the long stems are cane-like, holding the blooms erect, looking upwards like an airplane with wings spread, poised for flight. Plants seldom need staking. At Puyallup it won for best basket of dahlias and at Tacoma it won sweepstakes. Personally, we counted six blue ribbons on this variety. A very large stock enables the producer to list it at the low price of\$1.50

GENERAL DESCRIPTION OF VARIETIES

ACHIEVEMENT (SC). Gold with bronze shadings. Magnificent Dahlia of immense size and perfect form.....\$2.00

AIR MAIL (ID) (New). For description see above....\$1.50

PIXY. Orange yellow, tipped Indian red..... .35

SAMMY. Fine old gold..... .35

TOM THUMB. Orange red. Smallest grown..... .25

YELLOW GEM. Yellow. One of the best..... .25

CULTURAL GUIDE

Dahlias are easily grown, requiring no special soil, treatment or skill to bring them to perfection.

They are really an Autumn flower and should not be planted too early.

They are remarkably free from disease and have few special enemies.

Plant in sunny situation, although they will do nicely in partial shade.

Prepare the soil by deep spading; if soil is sandy a shovel full of well rotted manure may be incorporated with it; if otherwise use little, if any, fertilizer before plants begin to bud. Add sand or coal ashes to heavy soil.

Drive a stake in each hole to support the plant. Lay root down flat with eye upward and next to stake, about six inches deep, and cover two inches with pulverized soil, gradually filling to level as plant progresses.

As soon as plants are large enough, pinch out the top just above the second or third set of leaves; this causes the plant to branch.

Cultivate well until buds appear, then stop all cultivation except light raking after rain or watering, just enough to break the crust of ground; only be sure and do this.

When buds appear spread manure or some fertilizer around plant and rake lightly into the soil.

Sometimes a perfectly good root with a good eye will refuse to sprout; in such cases, dig up the root and soak for 24 hours in fresh water; this usually will cause it to sprout in a reasonable time after replanting.

Unless weather is very dry and hot, do not begin watering until buds appear, then soak the ground thoroughly (not sprinkle) about once a week or ten days. Cut off all faded flowers with as much of the stalk as you can.

For extra large blooms disbud by pinching off all the buds in a cluster except the strongest one.

For cut flowers pick in the evening or early morning if possible; burn the ends of stems in any flame, or dip in boiling water for 10 seconds; after either treatment place in cold water and put in cool place free from draft until wanted.

When frozen down in Autumn, cut stalks off at the ground and dig carefully so as not to break neck of root, for the eyes for next season's growth are only found where the root joins the stalk. Store same as potatoes where they will not freeze, shrivel or rot. Turn the clump upside down to drain out any moisture that may start decay.
